

Energy Symposium 2010

Track One Beginners (The Worm)- Agenda

On a drilling rig the inexperienced worker, one that is not yet a “hand”, is referred to as a Worm. Worms may be required to wear **orange** hard hats or stickers that say “new on job”. This track is for the entry level attendee, the Worm, to aid them in beginning to write and service oil & gas land operation insureds. The Worm will become familiar with basic terminology, gain a understanding of the differences between the key players of an oil & gas operation (operator vs. non operator) and obtain an in depth look into how a oil rig is erected and what happens when the worst happens-the rig comes down due to loss. Worm attendees will be able to communicate with underwriters and clients as well as identify exposures and risk coverage solutions upon the conclusion.

TIME	TOPIC	SPEAKER
8:30 – 9:45am	Terms & Definitions This session will aid the beginner level attendee (Worm) in learning the terms & definitions used within the oil & gas industry for all phases of exploration and production of hydrocarbons. This will include site preparation, drilling activity, identifying the various contractors involved, completion of the well and making it a producing well.	<i>Michelle Dennis AIS, API,CIC,CRIS,MLIS Bowen, Miclette & Britt, Inc. Troy White Cudd Well Control</i>
9:45 – 10:00 am	Break	
10:00 - 11:00am	Operators vs. Non Operators <i>There are many players involved in drilling a well and understanding who all the parties are will give the Worm attendee a complete understanding of who is who. There will be a complete review of the principle insurance risk for the owners, how to understand the Joint Operating Agreement and what the non-operating working interests are.</i>	<i>Bob Daniels Burke-Daniels Co., Inc.</i>
11:00 - 11:15am	Break	
11:15 -Noon	Operators vs. Non Operators (Continued)	
Noon - 1:00pm	Lunch	<i>Dan Eby, P.E. & Troy White</i>
1:00 - 1:30pm	Cudd Well Control Presentation	<i>Cudd Well Control</i>
1:45 - 3:00pm	Erecting a Rig <i>Get a complete inside look into how a rig is erected, the various parties involved in erecting the rig, the roles of the operators and non-operators plus safety issues.</i>	<i>Charles Scott, PhD Bowen, Miclette & Britt, Inc.</i>
3:00 - 3:15pm	Break	
3:15 - 4:30pm	When the Rig Comes Down <i>What happens when the worst happens-a fatality! Learn who is responsible for injuries and what regulatory agencies become involved.</i>	<i>Jacqueline Armstrong Bowen, Miclette & Britt, Inc.</i>
4:30 - 6:30pm	Reception
